

PORCELAIN™ Cleaner

Application instructions

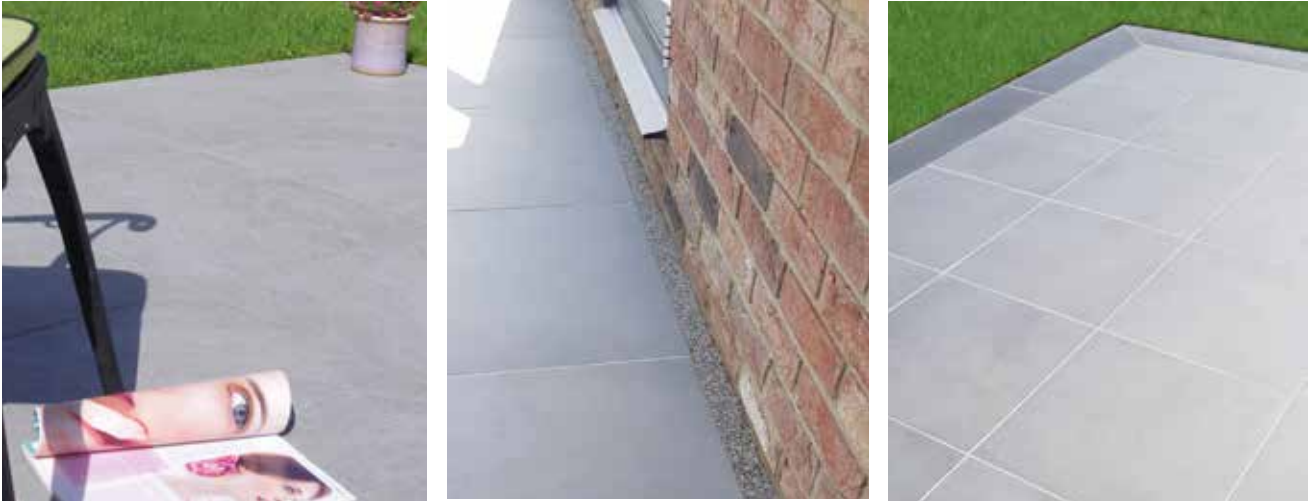

The **ProJoint Porcelain Cleaner** is an effective and high strength cleaning concentrate designed for the professional user. The chemical formulation is suitable for removing oil, grease, rubber marks, mould, mildew, algae and general dirt from porcelain paving.

Suitable for internal and external porcelain paving, its invisible repelling barrier provides long lasting protection, preventing re-growth of mould, mildew and algae.

application

1. Dilute 1 part **ProJoint Porcelain Cleaner** concentrate with 5 parts warm water depending on the severity of soilage. (Can be applied neat for stubborn stains.)
2. Apply to paving area and agitate stubborn stain with a brush or sponge.
3. Ensure all residues are removed with plenty of cold water.

IMPORTANT: Ensure the product is not allowed to dry on treated surfaces. Do not use around fish ponds or aquariums. Do not allow the cleaner to run off to enter any drains or watercourses. Wash hands and exposed skin after use.
